POWER-LITE®

Certainty at The Speed of Light

Remote Notes:

- The buzzer short beeps (~0.5s) ONCE when sensor successfully received RC signal after pressing any buttons except for "Ambient learn".
- The buzzer short beeps (~0.5s) TWICE to start learning ambient lux after pressing "Ambient learn" then followed by a long beep (~1s) to indicate the success of ambient learning.
- When "twilight level" set at 0%, it becomes ON/OFF control.
