Installation Instructions

This installation must be carried out by an electrician. Please read these instructions carefully before installation. Leave a copy for the user/maintenance engineer for future reference.

Safety

This is a mains powered product. Before installation, maintenance or cleaning please ensure the power supply is isolated.

Maintenance

a. Please ensure the fitting has cooled down prior to performing maintenance on this product.
b. If the product is not damaged in transport, it is supplied ready to use.
c. Clean using a dry cloth. No detergent or water to be used.

Notes

Voltage input: AC220-240V/50/60Hz, using the newest high efficiency constant current driver. Anti-electromagnetic interference, no mercury, no lead. Before using, please confirm that this product has not been damaged during transit.

Please keep packing material and small accessories far away from children. Avoid the eyes sighting the LED light-emitting area directly

Please keep products and packaging away from open fire or high temperature goods.

The fixture must not be modified. And modification will void the warranty and can make the product dangerous.

Please note the recommended clearance from the rear heat sink to any flammable materials is 0.2m. Under no circumstance should any insulation or similar be laid onto the fitting.

Applications

Hotel, meeting room, factory or office, residence or public facilities, commercial use, school, hospital and other environments.
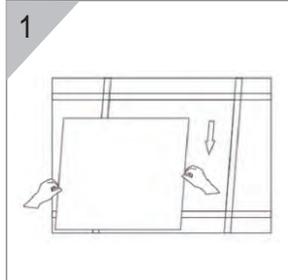

LED panel light for indoor using only.
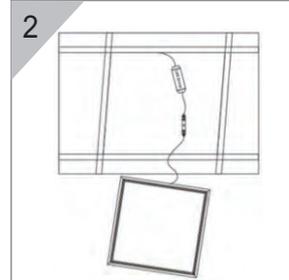

INSTALLATION
MANUAL

POWER-LITE®
Certainty at The Speed of Light
